now

Facts & figures

- The interdisciplinary congress of rehabilitation medicine
- More than 40 workshops and mini-symposia
- 7 renowned keynote speakers
- Excellent scientific research presentations

Neuroplasticity

Renowned keynote speakers

Inspiring programme

Ambient living

New research methods

Patient empowerment

Large number of mini-symposia

Assessment issues

Bionics

Brain computer interfaces

Technology

Ageing

Outcome measurement

New treatments

Global rehabilitation

Robotics

Education

Keynote Speakers

- Prof. Jane Burridge PhD
- Prof. Alarcos Cieza PhD
- Prof. Gregoire Courtine PhD
- Nathalie Goemans MD PhD
- Prof. Gert Kwakkel PhD PT
- Ton Schreuders PhD PT
- Prof. Michiel Wouters MD PhD

You are invited

During its 60th anniversary in 2015 the Netherlands Society of Physical and Rehabilitation Medicine (NSPRM) is taking up the challenge by adopting “Crossing Borders” as the theme of its annual scientific conference, the Dutch Congress of Rehabilitation Medicine (DCRM). A highly interactive and interdisciplinary conference will be organized in November 2015 in Rotterdam. Facing the ever-growing burden of long-term disabilities, international and interdisciplinary cross-border cooperation is becoming increasingly important.

All parties involved in improving the effectiveness, efficiency and accountability of subacute and long-term (community) rehabilitation, whether they have a clinical, scientific or legislative orientation, are invited to get involved in plenary and free paper sessions, topical symposia, and poster presentations.

We look forward to meeting you at the DCRM 2015 in The Netherlands!

Prof. Hans Rietman, MD PhD, president NSPRM

Rotterdam, A must-see city!
